

$$M_i(v) \longrightarrow s_i(v) \longrightarrow l_i(v) = f(s_i(v))$$

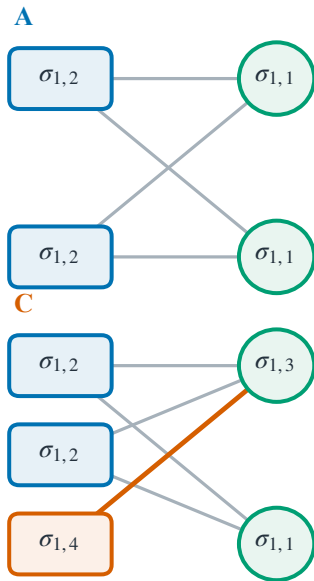

(a) Round $i=0$

$$\sum_{\sigma} c_i(A, \sigma) c_i(C, \sigma) = 10$$

$$S_0(A, C) = 0.9806$$

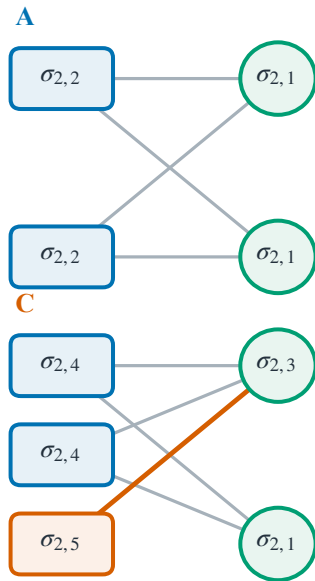

(b) Round $i=1$

$$\sum_{\sigma} c_i(A, \sigma) c_i(C, \sigma) = 6$$

$$S_1(A, C) = 0.8944$$

(c) Round $i=2$

$$\sum_{\sigma} c_i(A, \sigma) c_i(C, \sigma) = 2$$

$$S_2(A, C) = 0.7071$$

The same refined label means the same previous label and the same neighbor-label multiset.
